## To M. S. M.

It is with deep regret that I must say good bye to M. S. M., but in answering the call to active service, I do so with the hope that after the Big Scrap is over I shall be able to come back to complete my work for a degree. In leaving I wish M. S. M., the Faculty and students success for the New Year.

JOSEPH B. DUGA.

## COBALT MINE WILL SOON BE HUMMING.

### Plant to Start for Winter's Run With Force of Twelve Good Men on the Job.

The Idaho Recorder, Dec. 21.

J. H. Whittaker, the pioneer millwright, returned Sunday from four months of work at the Cobalt camp on the Caples ore-production plant. He reported the mill ready for operation with the exception of the adjustment of the concentrators, which work is being managed by W. E. Taylor, who is an expert in all details of quartz-mill operations.

This plant is arranged to run all winter with a daily capacity of 15 or 20 tons of hard cobalt ore. It has been demonstrated that this ore carries over three per cent of this metal which is quoted about 80 cents a pound. The returns from the plant should be very good. The labor will be performed by about 12 good men. The ore in sight in the camp and the market demand promises a continuation of this important enterprise for many years.

Edward D. Lynton, '12, is in Co. F, U. S. N. R., Training Station, San Pedro, Calif.

## URGES EXPERIMENT STATION AT ROLLA.

Washington, January 2.—An experiment station of the Bureau of Mines at the State School of Mines at Rolla will be sought tomorrow by Representative Borland, of Missouri. It would carry a \$25,000 appropriation and annual maintenance of more than half that sum at least. The bureau has established at many of the state schools of the country stations where the cheapest and most effective methods of separating ores is studied. Along with the scientific work which the bureau has its experts study, classes are given to the students in the most practical mining lessons. Representative Borland says he believes that Rolla offers exceptional opportunity for the study of zinc and lead.—Globe-Democrat, January 2.

At the instance of Director McRae, the proposition to establish the experiment station at Rolla was taken up and supported by President Hill, the Board of Curators, and the Governor of Missouri. The United States Senators have both pledged their support.

This experiment station would certainly be quite an asset to M. S. M., and our friends anxiously await the decision of the Bureau of Mines.

## Mining 11b.

Professor Charles E. Locke, of the Massachusetts Institute of Technology, will deliver the lectures of Mining 11b this year. This course will be given with three lectures per day, beginning January 14th, and ending February 2nd.

## TRAVIS TRAVERSE.

Camp Travis, Texas, December 28, 1917.

The Missouri Miner,  
Rolla, Mo.

Gentlemen:

The very interesting notes, entitled "Camp Funston Fun-goes," by two former Editors-in-Chief, which appeared in a recent issue of the Miner, leads this former Editor-in-Chief to jot down a few notes concerning the M. S. M. men at another great military camp. So, perched high up in the top deck of a "double-decker" with a "Corona" on my knees, I shall try to pound out the message that even in far-away Texas are to be found a number of M. S. M. men doing their bit. The list is by no means a complete one. I have been here only two weeks, and these are just the men that I have run onto in that short time.

I was ordered to report here to the 315th Engineers, and arrived in San Antonio early in the morning of Dec. 11th. I went to a hotel, and there met a number of other engineer officers who were to report to the same regiment. I was carrying a suit case with an old Miner pennant pasted on one end, and in about a minute a First Lieutenant came up and introduced himself as R. J. Paulette '12. When we reported we were both assigned to Company B, and his bunk is next to mine, so the two of us are able to hold the M. S. M.'s end among the men from many different colleges.

My next find was Bill Kamp, '17. He had just arrived, a brand new Second Lieutenant in the Signal Corps, and was going to

Kelly Field. We walked down the street, and had gone but a short distance when we heard a shout Jack Hoffman, '16. He is a First Lieutenant in the Infantry, and located over at Camp Stanley, about twenty miles from here.

I found "Husky" Aves, ex-'15, in a football suit, and apparently he was good as ever. He is a private in the Headquarters Company of this regiment, but leaves next week to attend the Engineer Officers' Training Camp at Petersburg, Va. As the candidates for this camp were picked from the whole regiment, it speaks well for his ability as a soldier to know that he was one of the twenty men from the 315th who are to go to Petersburg.

The next time I went in town three more were located. The first was Bob Massey, ex-'17. He is a Second Lieutenant in the Signal Corps, Aviation Section, and is located at Kelly Field. Then I met Capt. George Burnet, ex-'18, and Lieut. C. A. Peterson, '17, just arrived from several months' service at Deming, New Mexico. They are with the 165th Depot Brigade here at Camp Travis, working hard, and enjoying the sights of the city after a few months of the desert.

First Lieutenant Harry Nowlan, '14, came over from Camp Stanley on Christmas Eve., and had dinner with me. He is with the 20th U. S. Field Artillery.

The latest is Sergeant Jack Craig, ex-'17, Company E of the 315th Engineers. He is working hard for a commission.

We hope to locate any more men who may be here and then get together for a little party, and to talk over old times. We think we have a pretty good showing, so when M. S. M. flies her big service flag don't forget to put on a few stars for the boys in Texas.

Very sincerely yours,

JAS. L. HEAD,  
Lieut. Engineers, U. S. R.

### JUNIOR COLUMN.

James P. Gill has now entered the restaurant business. He wears a dipper on his head instead of a hat.

Don't worry about the decreasing student enrollment. One of the Seniors can tell some very interesting experiences when Kansas School of Mines had four students.

Notice: Those students who wish to learn to knit, and thereby help the Red Cross, should attend the class which will be given by Wilkinson. See him for further particulars.

The reconnaissance, preliminary, and location surveys for the Junior play have been made, and construction will begin immediately.

Rolla society again appeared prominently in student annals—in the New Year's resolutions this time.

"Gabe" Harris discovered a new way to enjoy himself in St. Louis. That's easy but now focus your attention on Rolla.

No doubt several members of the class took advantage of the sojourn in St. Louis, and studied some of the boiler rooms and power plants in that city.

"Snutz" Miller did a peculiar thing last week. He returned to Rolla Dec. 28. There's a reason.

Prof. Dean may prove that two and one are equal, but Prof. Muilenburg can go him one better. He can prove that a glacier can be advancing and retreating at the same time.

In addition to those men who were picked to go to the Engineer's training camp at Petersburg, Va., "Buck" Mountjoy and "Bob" Burg were appointed to the training camp at Fort Riley, Kansas.

Rumors have it that "Bob" Burg, '16, was recently married.

## SENIOR COLUMN.

After spending a most delightful Yuletide vacation the men of the 1918 class have been drifting in one by one.

Geib went to Denver to spend his first Christmas at home since he has been enrolled at M. S. M. He evidently is making up for lost time, as he has not yet returned. Take your time, 'Pohn,' we are for you.

John Morris, '18, is attending the annual conclave of the Sigma Nu fraternity, as the delegate from the local chapter. The national convention is being held in Cleveland, Ohio, at the Hollenden Hotel.

A. C. Starkey spent New Year's day in Toledo, Ohio.

Joe Duga, '18, who recently enlisted as a machinist in the Ordnance Department of the U. S. service has been notified to report January 6 at Chicago. We are all sorry to see "Chief" leave us, but glad that he has been selected by the Government for special service. Best luck to you, Joe.

The Geology Department has finally run out of red ink. Black ink was used instead, and we note that the grades have been materially higher.

Housholder was appointed as associate member of the legal advisory board in Ohio, while he was at his home in Bowling Green, Ohio, vacation time.

Of the five men sent to the third officers' training camp from the 314th Engineers, two were former 1918 men at M. S. M., namely Corporal Bob Lyons and Private G. E. Ebmeyer.

Howard E. Lillington, '18, is a Corporal of the 17th Engineers, American Expedition in France.

Lt. L. H. Cunningham, '18, joined the benedicts Christmas week, when he married a girl from his home town, Columbus, Kansas.

The Seniors were all glad to

hear that Chas. Schneidt, ex-'18, better known as "Porchy," who has been working on a surveying gang of the valuation department of the Interstate Commerce Commission, will be among the former 1918 men who will return to school next semester. Balderson, ex-'18, who has also been working on the same gang, is trying to arrange to attend M. S. M. again next semester.

C. E. Bardsley, ex-'18, who has been doing topographical work on the Mexican border with the U. S. G. S., expects to enroll soon.

L. J. Zoller, ex-'18, who is now working for Valerius, McNutt & Hughes, of Tulsa, Okla., will also join us. The two latter men will be candidates for graduation in the spring.

Harold Ewing Spickard, ex-'18, (our old boozum fren') has been appointed to attend the third officers' training camp. Here's to you, Spick.

Chavez and Duga spent most of their vacation period in Rolla, but went up to St. Louis for New Year's day.

Maness, Burkhart and Decker also remained here for most of the period, at least.

H. S. Clark remained in Rolla during the vacation period. He did special work in the Experiment Station.

Of the 30 men sent to the third training camp from the 314th Engineers, five of them were Missouri School of Mines men. They were: Sergeant John S. Wood, ex-'17; Sergeant M. P. Brazill, '19; Corporal J. J. Doyle, ex-'17; Corporal Robert Lyons, '18; G. E. Ebmeier, '18.

Only one and seven-tenths per cent of the regiment may attend mighty fine showing for the Miners to get one-sixth of the number recommended.

These men will be put in training January 5 at Camp Lee, Petersburg, Va.

Phil Colbert, '21, who was only in M. S. M. for a few weeks at the beginning of this school year promises to be back in time to begin the second semester.

B. W. Adams, '16, resigned his instructorship in physics in Akron University, Akron, Ohio., and has joined the 28th Engineers, Camp Meade, Md.

## FRESHMAN COLUMN.

It was indeed a blue Wednesday when the Frosh again assumed their mantle of servitude. To return to school after a glorious, happy, careful existence. The king of their home towns returned. The big frog in a little pond again becomes the little frog in a big pond. Wasn't it great to go home, be received as the conquering son home from college, full of experience and manliness? Wasn't it great to walk through the old high school, the Alma Mater dear, to lord around the halls with all the girls, telling them about our experience at college? To be the worshiped hero of all high school boys. Then to stride into the Christmas meeting of that high school feat. To give them the advice and counsel of the returned alumni. And then the dances and the parties. Oh, boy! wasn't it great, when we stepped out all dolled up in our full dress. What a rise from our green cap to a high hat, and that new suit. Didn't we cut a few capers, tho? Well, we certainly did show them a few things, wearing our dignity with such grace and ease. And then,—well, all great things must come to an end. Holidays can't last forever, and so back we came. Arriving in St. Louis from our home town, it was, Hi Frosh, have a good time? Well, it was a fall from the king to servant. From the lorded one to the furnace man. Wasn't that cellar in the house in an awful shape when we went downstairs to start the fire Wednesday morning?

## At the Table.

"Do you know anything about camouflage?"

"No; I never eat foreign cheese."—Lamb.

## The Last Quarter.

The Christmas vacation is now only a dream. All the boys are back, and glad to be here for after ten strenuous days of social life the peace and quiet of Rolla is quite restful.

But the whistle has blown for the last quarter. There is but two weeks left in this semester. Much has yet to be done in that short time. For those who have slacked a bit it is the last chance to make good. And so let us all dig in and make these last two weeks count, and have every student "Go Over the Top."

## Gave Eve a Raw Deal.

„They say that the game of cards is of very ancient origin."

"Undoubtedly! Satan, you know, played the deuce in the Garden of Eden—beat a pair, as it were." —Kansan.

### War Demand for Men With Scientific Trained Men on the Increase.

Secretary of War Newton D. Baker urges men in scientific institutions to continue their training.

"The Government service will demand more and more scientifically trained men," said he, "and I hope those who are in charge of scientific institutions will impress upon the young men the importance of continuing their studies, except to the extent that they are necessarily interrupted by a mandatory call under the provisions of selective service law."

Every effort will be made to use each student's special training in connection with specialized occupations in the Army, to afford technical students liable to call as great an opportunity through the National Army as if they had enlisted.

"He disappeared after he had borrowed ten dollars."

"And he was such a promising young man."

"That's how he got it."—Froth.

"See here, there is a hair in my soda."

"Oh, it's that boy again. He's so care'less in shaving the ice."—Widow.

Fresh Frosh, to mechanical drawing instructor: "How can I use this drawing pen correctly, sir, when it is always against the rule?"—Widow.

"I asked her if I could see her home."

"And what did she say?"

"Said she would send me a picture of it."

'20 on the chair: "Got any thumb tacks?"

'21 at the door: "No, but I've got finger nails."

Swift exit.

—Orange Peel.

An elegant party was given by Profs. Blackwood and Wallis at the latter's home on Dec. 27, for the students who remained in Rolla during the holidays.

Informal dances were given at the Kappa Sigma House and Pi Kappa Alpha House on the evenings of Dec. 31 and Dec. 26, respectively.

A party was given by the Sigma Nus Sunday evening, Dec. 30.

Other parties too numerous to mention. Gee! what a time those fellows who stayed in Rolla during the holidays must have had.

### The Soul of Wit.

## TALES AND TAILINGS.

If a man never changes his opinions, he never corrects his mistakes.

Once there was a grouch, and he crabbed all the day,  
And he swore and he fought  
and he grumbled,  
'Till a knowing lad asked, "How much did he lose?"  
And then it was that we trembled.

—Ex.

## Definitions for the Day.

Miser: One who kills two birds with one stone, and then wants the stone back.

Tact: The art of saying nothing when there is nothing to be said.

Epigram: An artistic way of saying something that isn't true.

Deficit: What you've got when you haven't got as much as if you didn't have anything.

The square and the level are necessary in both the laying of the foundation of a building or a reputation.

An Arab will not run if he can walk.

He will not walk if he can stand still.

He will not stand if he can sit down.

Arabs are not good students.

Two students who stayed in Rolla during the holidays were in the post office talking.

The First Stude: Did you go to the party last night?

Second Stude: Sure.

First Stude: Did you have a good time?

Second Stude: Most certainly.

First Stude: What did they do at the party?

Second Stude: I don't remember.

First Stude: I believe you.

Existence is Optimism. Pessimism is Oblivion. When you reach the cross-road sign: Stop!

Look! Listen!

Knowledge is of two kinds. One we receive from others, but the one we dig out ourselves is the most important.

Wouldn't it be wonderful  
If all the wonderful men  
And wonderful girls  
That one hears of  
In an hour of campus  
Conversation  
Could get together  
For one of those  
Wonderful times,  
Also so common?  
Will heaven be like that,  
We wonder—Volante.

## Songs of the Sammies.

American Field Headquarters,  
France, (By Mail.)

I've been working on the railroad,

Awll the livelong da-ay,  
I've been working on the railroad

Just to pass the time aw-a-ay."

Any sweet singer of pool-room melodies can finish the words for you. But there is only one crowd that can sing it so convincingly that you know right off the bat they have been working on the railroad. They are the railroad engineers, coming mainly from Pittsburgh, New York, Chicago and San Francisco. They're scattered all over the place, from sea coast all through the American supply bases right up to the camps of the Expedition. In a few short months they have filled the Corps with a spirit that will live through the war wherever engineers may be found—which is most everywhere. That spirit is expressed in the engineer's little ditty, which concluded:

Oh, we build all the barracks, and we lay all the ties; and we dig all the ditches for the other kind of guys."

M. E. Willimott, '12, is in Co. E, 110th Engineers, Camp Doniphan, Okla.

## SOPHOMORE COLUMN.

Quite a few of the Sophs have returned from the Christmas festivities. Others who are still stranded by the wayside missed a wonderful physics quiz. No doubt there will be much weeping and wailing and gnashing of teeth because of the extreme pleasure they missed.

Perhaps there was more truth than fiction in Prof. Blackwood's statement that he knew that his physics class was full of spirits.

Prof. Dean is now letting the intergrater grate. Very few of the Sophs are scratched as yet, however. What few scars they had healed perfectly during the holidays.

The boys are getting accustomed to captivity again, and have resigned themselves to their fate for the next five months. Nevertheless thots of bygone days still linger in their imaginative brains.

We understand that "Cat" Hume is not returning to school. We are very sorry to lose him from the ranks of the Sophomore class.

## A Letter From T. A. Stroup.

In a letter received from T. A. Strop, among other things he says:

It may interest my old friends and schoolmates to know that I am now attached to the staff of Mr. John W. Hornsey, of 120 Broadway, New York City. Mr. Hornsey is a chemical engineer, who specializes in potash and salines, and for him I am in charge of the building of a plant at Marysvale, Utah, to extract potash from alunite. My headquarters are at 435 Atlas Block, Salt Lake City, but my temporary address is Marysvale, Utah, care of Mineral Products Corporation.

H. J. Teas. '17, C.o A, 27th Engineers, is to take an examination in January for a provisional Second Lieutenant.

# Allison, the Jeweler

Wishes to thank the Students very kindly for their holiday patronage. May the coming year be a happy and prosperous one for all of you.

## Watch!!!

BEVO—a proven, whirlwind success—has been followed by a host of imitations. They are offered in bottles of similar shape and color, with labels and names suggestive of the BEVO bottle's embellishments.

But you don't taste the package—it is the contents you must depend upon for enjoyment. Beware of these various just-as-goods—don't try to identify BEVO by the shape of the bottle alone.

## Look!!

Certain identification marks protect you against the spurious—not only the imitations of the product, remember, but attempted resurrections—the old failures that are now masquerading in bottles similar to that of the new success. Look for these unmistakable marks of the genuine—have the bottle opened before you; then,

## Look for the Seal

See that it is unbroken; covers the Crown Top, and that the Crown Top bears the Fox trade-mark.

Be sure the Bottle bears this label

## Listen!

BEVO is a pure drink. Which means more than that it contains pure ingredients—means that, while you may have good reason to suspect some milk or water of containing germs, BEVO—a pasteurized product in sterilized bottles—is always absolutely free from them.

BEVO is also healthful—the choice cereals and Saazer hops from which it is made make it so—and you will find its refreshing quality and flavor delightfully unlike any you ever tasted in a soft drink.

Demand the genuine. On sale at all first-class places. Your grocer will supply you by the case.

Manufactured and bottled exclusively by Anheuser-Busch, St. Louis, U. S. A.

Always drink Bevo cold

The all-year-round soft drink
